This is fine.

>>> <Robin.George@epamail.epa.gov> 2/17/2009 11:07 AM >>>
Shelton, thank you for calling after you all resolved your phone problems. I wanted to pass on to David Albright, my supervisor my notes from our discussion. Please advise if these are not complete, accurate.

There are concerns about encroachment of the oilfield related injection fluids that AERA will or will not be affecting neighboring users, various existing uses of the water
There are concerns about future uses of the Tulare sequence of aquifers in this area based upon projected trends from current development
The Fresno Regional Board has requested an extension to the 30-day period as publicly noticed for the South Belridge Field Aquifer Exemption. Items of consideration that the Regional Board will be reviewing include:
limiting injection to deeper zones with lower quality water -
discussion of possible, alternative courses of action
a comprehensive (life of the project) pressure distribution projection for the extended oilfield project area which will include "wastefront" distribution
protective requirements that include monitoring, verification and reporting of the project's performance restricted to that within the Aquifer Exemption area
The Regional Board will request, schedule a meeting with the three agencies (US EPA Region9, Ca. DOGGR and Fresno Regional Board) after their review is complete.

Sincerely,

George Robin
Engineer

Re: (Confirmed Time) Conference
Call - AERA So. Belridge
Aquifer Exemption

Just call me direct at 559-445-5508 - 9:30, thanks
shelton

Shelton,

This is to confirm the phone conversation I just had with Clay Rodgers
(please check if I got his e-mail correctly) requesting to delay the
conference call from 9:00am to 9:30am this Tuesday, Feb. 17th.

I am not sure how long David can remain on the line past 10:00am,
however, Clay and I had a good discussion and agreed that perhaps we
will be able to limit our conference call to broad coverage of concerns.
A more detailed discussion will be outlined and requested from the DOGGR
District 4 for their participation for any follow-up action.

Clay and I also discussed future Aquifer Exemptions, including the
active applications that are currently being reviewed. We were
regarding how our three agencies can coordinate in advance of the public
process period during the technical evaluation phase. Of course, much
of the need for coordination depends upon the situation but it is always
a good policy to revisit.

George Robin

Conference Call - AERA So.
Belridge Aquifer Exemption

Hi Shelton,

Please confirm if a conference call this Tuesday, Feb. 17th from 9:00 -
10:00 am is good for you.

We will call you at your office (David, we have conference room 1203).
Please let me know if you want us to call you at a different number.

George Robin
Engineer
